Case Study: United Kingdom
Inaccurate Experience Certificates

DATAFLOW

Overview

A British national seeking employment as a medical professional in a Gulf Cooperation Council (GCC) country submitted four documents to the DataFlow Group for verification. These included one education credential, one health licence and two experience certificates.

Upon implementing Primary Source Verification (PSV) and following extensive communications, the DataFlow Group was unable to authenticate the education credential as the issuing authority happened to be located in a war-torn country. Coupled with this, both experience certificates were classified as fake; the first due to a discrepancy in the dates of employment and the second due to a discrepancy in the designation of the applicant as a Specialist Registrar at hospital in Ireland. However, the DataFlow Group confirmed that the submitted health license - which was issued by a leading European medical regulator - was genuine.

DataFlow Group Solutions

In order to determine the accuracy and authenticity of the Applicant's documents, the DataFlow Group conducted:

• **Online Research** - The DataFlow Group boasts an expert research team that specializes in the extraction of critical information from worldwide online databases

• **Primary Source Verification** - The DataFlow Group has emerged as the leading international provider to solely focus on background screening and immigration compliance solutions using Primary Source Verification

• **Cross Checking** - The DataFlow Group leverages an expansive network of over 60,000 issuing authorities throughout more than 200 countries and territories to verify the authenticity of various documents

Operational Excellence

- Global Outreach Covering 200+ Countries
- Worldwide Network of 60,000+ Issuing Authorities
- Unique Set of Customised Services
- Fast Turnaround Time
- International Partnerships and Affiliations
- Qualified Experts and Researchers with Multilingual Capabilities

Technological Leadership

- Cutting-Edge Online Process Flow
- Robust Platforms
- Industry Leading Information Security
- Fast and Accurate Data
- Proprietary Databases
- Advanced Ecosystem and Robust IP-Based Delivery Framework

Result

Upon conducting thorough PSV, the DataFlow Group marked the case as 'Negative' - therefore emphasizing the importance of authenticating all information listed on a document.
